| Returned to applicant for correction  | <u> </u>                  |
| Corrected application filed   | <u> </u>                  |
| Map filed   | MAR 12 1992 under 57238   |
| *******  The applicant ConAgra, Inc., hereby make application for permission to change the Point of Diversion of a portion of water heretofore appropriated under Permit 44647  |                           |
|   | *******                   |
| 1. The source of water is Underground   |                           |
| 2. The amount of water to be changed 2.5 c.f.s., 1,120 g.p.m., 90.5 AFY consumptive use   |                           |
| 3. The water to be used for Industrial  |                           |
| 4. The water heretofore permitted for same  |                           |
| 5. The water is to be diverted at the following point of diversion under Permit 57241 as shown on map filed March 12, 1992 under Permit 57238; Production well 47C-1, NE¼ of SE¼ of SW¼, Section 1, T22N, R26E, having a bearing S 09°07'48" E, 1,105.36' to the S¼ corner of said Section 1. |                           |
| 6. The existing permitted point of diversion is located within the SE¼ of the NW¼ of Section 12, T22N, R26E, MDB&M at a point from which the W¼ corner of said Section 12 bears S 75°35'28" W, a distance of 2,719.68 feet. See map under Permit 44643.                                       |                           |
| 7. Proposed place of use same as existing place of use; See map under Permit 44643.   |                           |
| 8. Existing place of use 160 acres - NE¼ of NW¼, SE¼ of NW¼, SW¼ of NW¼, NE¼ of SW¼, Section 12, T22N, R26E, MDB&M  |                           |
| 9. Use will be from January 1 to December 31 of each year.  |                           |
| 10. Use was permitted from January 1 to 1   | December 31 of each year. |
| 11. Description of proposed works Existing well and pump under Permit 57241   |                           |
| 12. Estimated cost of works n/a   |                           |
| 13. Estimated time required to construct works n/a  |                           |
| 14. Estimated time required to complete the application of water to beneficial use n/a  |                           |
| 15. Remarks: Due to pumping of the resource by Brady Power Partners, the water level has  |                           |

supplied to Applicant during the 2003 onion drying season. This Application is without prejudice to all of Applicant's contract and other rights.

## APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion of a portion of the waters of an underground geothermal source as heretofore granted under Permit 44647, is issued subject to the terms and conditions imposed in said Permit 44647. No other rights on the source are affected by the change proposed herein.

It is understood that the amount of geothermal fluid herein granted is only a temporary allowance and that the final right obtained under this permit will depend upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease in reservoir pressure and heat. The well shall be constructed and maintained to prevent any waste of the geothermal fluid above or below the surface. The producing well discharge shall be closely monitored and recorded. The amounts of fluid injected back to the reservoir shall also be monitored and recorded to determine the total annual diversion and consumption for beneficial use.

The annulus of any well drilled under this permit is to be cemented from the top of the producing or injection interval to surface to prevent waste and to prevent any communication with fresh ground water. Only geothermal waters are to be diverted under this permit and the cooled geothermal fluids are to be returned to the source via the injection well.

This temporary permit does not relieve the operator of the requirements of any other state, local or federal agency.

This temporary permit does not extend the permittee the right of ingress or egress on public or private lands.

An annual report that documents the amounts of fluids produced, injected and/or consumed shall be filed under this permit not later than on January 31 of the year following the reporting year. Any exploration and subsurface information obtained as a result of this project shall be kept confidential pursuant to Chapter 534A.031 of the Nevada Revised Statues (NRS).

The total withdrawal of geothermal fluid under this temporary permit shall be limited to 90.5 acre-feet per year. This temporary appropriation permit allows for a total consumptive use of the geothermal fluid that shall not exceed 90.5 acre -feet per year. The State Engineer reserves the right to make findings regarding the consumptive use of the geothermal fluid under this permit and impose additional conditions thereto.

This temporary permit is issued subject to the terms and conditions imposed by State Engineer ruling Number 3894 dated June 26, 1992, and is subject to the agreements executed by and between Gilroy Foods Inc. and Brady Hot Springs Geothermal Associates dated December 18, 1987, and by and between Gilroy Foods Inc. and Nevada Geothermal Power Partners, Limited Partnership dated February 1, 1991.

(CONTINUED ON PAGE 3)

This temporary permit is issued with the understanding that the Monitoring Plan, which is Exhibit A of the Stipulation dated June 21, 1996, by and between Brady Power Partners and Gilroy, Foods Inc., will continue to be implemented. Any modifications of the reservoir-monitoring program shall be approved by the State Engineer, the Nevada Division of Minerals and the Nevada Division of Environmental Protection.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **June 12, 2004** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.5 cubic feet per second.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HIGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the scal of my office,

this 13th day of June 2A.D. 2003

State Engineer
